

**RF Exposure Statement  
KTVU Oakland, CA  
Repacked Channel 31**

The facility proposed in this application is essentially identical to the replicated post Incentive Auction facility described in the repacking notification sent to the station. In that the facility replicates the currently authorized facility (including a 1.1 dB dipole factor power reduction) that was previously determined to meet RF exposure requirements, the proposed facility is also expected to comply with the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
