

## **TV Station KVPT • Channel 32 • Fresno, California**

### **Technical Summary and Environmental Exhibit**

An environmental assessment is not required, as grant of this request would not be considered a major environmental action. This application intends to maximize the KVPT post-auction Channel 32 operation to an effective radiated power of 250 kW. The KVPT Channel 32 antenna will be top-mounted on an existing registered structure and will not increase the overall height of that structure.

The maximum calculated power density at 2 meters above ground was found to be less than 5% of the applicable public exposure limit ( $0.39 \text{ mW/cm}^2$  at Channel 32). The proposed operation is therefore categorically excluded under Section 1.1307(b)(3) of the FCC rules from having to consider the contributions of other stations at the site. None of the other factors specified in Section 1.1307 of the Rules are believed to apply.
