

Amendment

This amendment is to reduce the ERP, change the antenna make and model, and change antenna orientation so that the proposed will operate post-incentive auction facilities that do not expand the noise-limited service contour in any direction beyond that established by the post-incentive auction channel reassignment public notice.

We had to change tower sites because the location called for in the post-incentive auction channel reassignment public notice is not longer available to us.

Attached is a map showing the 51 dBu contour of the post-incentive auction channel reassignment in cyan the proposed 51 dBu contour in red.
