

TV Station WPXT • Channel 34 • Portland, Maine

Environmental Exhibit

An environmental assessment is not required, as grant of this request would not be considered a major environmental action. The maximum calculated power density at 2 meters above ground was found to be less than 5% of the applicable public exposure limit (0.395 mW/cm^2 at the Channel 34 center frequency of 593 MHz). The proposed operation is therefore categorically excluded under Section 1.1307(b)(3) of the FCC rules from having to consider the contributions of other stations at the site. None of the other factors specified in Section 1.1307 of the Rules are believed to apply.
