

**Engineering Statement**  
**Minor Modification of Construction Permit**  
**WNJS Channel 23 Camden, NJ**  
**November 1, 2017**

The purpose of this application is to modify the Post-Incentive Auction Facility Construction Permit of WNJS channel 23 Camden, NJ as permitted during the current "Maximization Filing Window".

An analysis using the FCC's TVStudy software with its default settings has indicated that WNJS can increase its effective radiated power (ERP) from the currently authorized 202 kW to the requested 281 kW without causing new interference to other stations above the allowable de minimis limit. A copy of the TVStudy analysis results file showing no interference above the allowable de minimis limit is attached to this application.
