

**Engineering Statement**  
**Minor Modification of Construction**  
**WWL-TV Channel 27 New Orleans, LA**  
**November 1, 2017**

The purpose of this application is to modify the Post-Incentive Auction Facility Construction Permit of WWL-TV Channel 27 New Orleans, LA as permitted during the current "Maximization Filing Window".

The change proposed in this application is to increase the effective radiated power (ERP) from 829 kW to 1,000 kW.

An analysis using the FCC's TVStudy software with its default settings has indicated that WWL-TV can increase its ERP to 1,000 kW without causing new interference to other stations above the allowable de minimis limit. A copy of the TVStudy analysis results file showing no interference above the allowable de minimis limit is attached to this application.
