

TECHNICAL SUMMARY

TELEVISION STATION WPXV-TV  
NORFOLK, VIRGINIA  
CHANNEL 32 1000 KW (H), 250 KW (V) 376 M HAAT

1. The instant application is for an expanded facility for the authorized facility of WPXV-TV, Norfolk, VA (Channel 32).<sup>\*</sup> By means of this application the maximum effective radiated power (ERP) of WPXV-TV will be increased to 1000 kW. There are no other changes proposed.

2. The proposed facility is compliant with the ‘largest station in the market’ provision of Section 73.622(f)(5) of the FCC Rules. It is proposed to operate on Channel 32 with a maximum directional ERP of 1000 kW and an antenna height above average terrain (HAAT) of 376 meters. These facilities exceed the normal maximum permissible facilities specified in Section 73.622(f)(8)(i) of the FCC Rules. However, the proposed facilities have been calculated in accordance with the largest station provision of Section 73.622(f)(5) of the FCC Rules. Specifically, the largest station in the Norfolk-Portsmouth-Newport News market is WSKY-TV, Manteo, NC, Channel 9, which is licensed to provide noise-limited 36 dBu, f(50,90) service to an area of 37,180 square kilometers.<sup>†</sup> The proposed WPXV-TV operation is predicted to provide noise-limited 41 dBu, f(50,90) service to an area of 29,960 square kilometers.<sup>‡</sup> Therefore, the proposed WPXV-TV facility is compliant with the largest station provision of the FCC Rules.

3. The instant proposal is compliant with the interference protection requirements of the FCC Rules. The results the FCC’s *TVStudy* analysis are attached hereto as an exhibit. It is noted that use of a higher resolution terrain profile increment of 0.5 km is requested for the *TVStudy* analysis.
