

ENVIRONMENTAL IMPACT STATEMENT:

This Application merely requests permission to re-locate Station KTGF to a new location and increase its ERP.

The Licensee proposes to locate KTGF TV as an established broadcast communications site, in an existing building and on an existing tower.

Nothing involved in this proposal creates a situation involving an Environmental Impact Statement.

The Licensee, in cooperation with the owner of the tower, will make sure that potential RF exposure to the public or to workers is addressed by appropriate signage and fencing at the site.

The Licensee will, when necessary to protect workers, reduce its operating power or cease operations while work is being done on the tower or at the site.
