WTMJ-TV ENGINEERING STATEMENT

Scripps Broadcasting Holdings, LLC
Milwaukee, WI

The attached application is prepared on behalf of Scripps Broadcasting Holdings, LLC, licensee of WTMJ-TV - Milwaukee, Wisconsin. WTMJ-TV is presently licensed to operate on Channel 28 with a maximum effective radiated power of 1000 kilowatts at 272.6 meters above average terrain using a directional antenna. It also holds a construction permit authorizing operation on Channel 32 with a top mounted directional antenna on the present WTMJ-TV tower with a maximum horizontally polarized effective radiated power of 650 kilowatts and a maximum vertically polarized effective radiated power of 162.5 kilowatts at 304.6 meters above average terrain using an elliptically polarized directional antenna to replicate as closely as possible the post-repack facilities authorized for WTMJ-TV. This application proposes to modify the WTMJ-TV Channel 32 construction permit to increase the horizontally polarized effective radiated power to 1000 kilowatts and the vertically polarized effective radiated power to 250 kilowatts using the antenna system presently authorized by WTMJ-TV's Channel 32 construction permit.

A separate exhibit provides details on this proposed antenna, which was supplied by the antenna manufacturer. The installation of this new top mounted antenna will reduce the overall height of this tower from 334.1 meters AGL to 330.7 meters AGL. Because it doesn't appear that the LMS filing system will permit the overall height of a registered tower to be modified before the registration has been modified, the attached application specifies the presently registered height of this tower. This will be modified once an updated FAA approval has been received and the registration for this tower (1034393) has been modified to reflect the reduced height.

This exhibit includes the results of the FCC's TV Study program for the proposed facilities. This data shows that these proposed facilities won't be predicted to cause any new or increased interference exceeding the 0.5% de minimis value permitted by the FCC Rules to any other post-repack facilities requiring protection consideration.

The predicted 48 dBu principal community contour for the proposed facilities will totally encompass Milwaukee, as required by Section 73.625(a) of the FCC Rules.

A separate exhibit attached to this application documents that the proposed WTMJ-TV facilities will comply with the FCC's requirements regarding human exposure to nonionizing radiation.
