

KTXD-TV

Reason for Amendment

On October 27, 2017, the KXTD-TV submitted an application for minor modification of a construction permit, LMS File No. 34280. The application was timely filed during the second filing window. *See Incentive Auction Task Force and Media Bureau Announce the Opening of the Second Filing Window for Eligible Full Power and Class A Television Stations—October 3 Through November 2, 2017*, DA 17-911 (Sept. 20, 2017) (“Second Window PN”).

The application mistakenly identified the antenna as a Dielectric TUM-C3-AP-14/42H-2-R-T rather than a Dielectric TFU-C4-AP-14/48H-2-R-T. This amendment is being filed to correct this mistake.

Accordingly, the revised information provided as part of this amendment should be treated as though filed in the second filing window. *See* Second Window PN, para. 5 (“A station that files an application during the second filing window that is incomplete or defective will be contacted and afforded an opportunity to submit an amendment via LMS to cure any defects.”).
