

**South Florida PBS, Inc.  
WXEL-TV, West Palm Beach, Florida  
Facility ID No. 61084**

**Supplemental Information in Support of Legal STA Request**

In response to an inquiry from the Commission's staff, South Florida PBS, Inc. (SFPBS) states that the requested 90-day extension will not impact the post-auction transition. All stations in South Florida were assigned to Transition Phase 2, under which testing can begin on December 1, 2018, and operations on stations' post-auction channels must commence by April 12, 2019.

Channel 18, the over-the-air channel on which WXEL-TV now broadcasts, will be assigned to WTCE-TV, Ft. Pierce, Florida (Facility ID No. 29715). The brief delay requested in implementation of the channel-sharing agreement between WXEL-TV and WPBT will expire in April 2018, several months before WTCE-TV would be even permitted to commence testing on channel 18. Therefore, grant of this request will not delay or disrupt the post-auction transition schedule.
