

Progression of changes for WMNO-CD

- 1) Move on original Channel 28 from Original Site to Current Site. This is complete and licensed.
- 2) Pending application number 34600 is to amend our repack channel change CP (file number 28281, channel 18) from the Original Site to the Desired Site.
- 3) The instant application requests to move the Current Site to the Desired Site on the original channel 28.

If these applications are approved, it is our intention to build the Desired Site on our assigned repack channel 18. We are scheduled to move in Phase 2. If we cannot move early, we will move the existing channel 28 and operate until we can change to channel 18 in Phase 2.
