

TV Station WGBC • Channel 31 • Meridian, Mississippi

Environmental Exhibit

WGBC proposes to increase its effective radiated power from 828 kW to 1,000 kW, with no changes to the antenna or tower. An environmental assessment is not required, as grant of this request would not be considered a major environmental action. The maximum calculated power density at 2 meters above ground was found to be less than 5% of the applicable public exposure limit. The proposed operation is therefore categorically excluded under Section 1.1307(b)(3) of the FCC rules from having to consider the contributions of other stations at the site. None of the other factors specified in Section 1.1307 of the Rules are believed to apply.
