

**Amendment Narrative**

Pursuant to a telephone conversation which took place on December 5, 2017 with Ms. Thanh-Nga Nguyen, the pending application having FCC file number 0000034908 has a largest station in the market analysis which does not match the Commissions calculation methodology. The FCC calculation methodology determines that the proposed KVCR ERP of 27.2 kW creates a geographical coverage area larger than the largest geographical station in the market which is KCOP having FCC File No.: BLCDT-20100709AFG which is prohibited.

As a result the Effective Radiated Power (ERP) is being decreased from 27.2kW to 26.7kW in order to bring the station into compliance. The application exhibits have been amended to reflect the reduced ERP, no other changes are proposed.
