REASON FOR SPECIAL TEMPORARY AUTHORITY

WNXY-LD has been silent since December 16, 2016, and must resume operation by December 16, 2017, in order to avoid expiration of the station license pursuant to Section 312(g) of the Communications Act.

The station is not in position to resume operation with its licensed facilities and does not want to undertake the expense of being able to do so, because Channel 43 is outside the repacked television station band, and the station will have to change channels in the relatively near future.

This application proposes temporary facilities to operate on licensed Channel 43, to enable the station to resume operation prior to the license expiration deadline, while the licensee awaits the Commission's release of a database that will enable it to determine which channel and facilities it may be able to use in the long-term future.
