Request for Wavier

Applicant hereby requests wavier of the Commission's current freeze on LPTV displacement applications in accordance with DA17-584. Ventana Television has received notice from T-Mobile that they plan to begin testing of their wireless operation in PEA #125 (St. Louis, MO) on 02/04/2018 on channel 38, currently licensed to and in operation as K38HD-D. This is in advance of the close of the anticipated Special Displacement Window for LPTV and translator stations currently on channels 38-51.

Notice from T-Mobile is attached. This displacement application to be followed by an STA application to begin operations on the requested channel 15.
