WIVX-LD
Facility ID 50144
Loudonville, OH

REASON FOR GOING SILENT

WIVX-LD is licensed to operate on Channel 51 and has ceased operation because of a demand by T-Mobile, which has claimed interference to its 700 MHz block cellular wireless operations.

The station cannot resume operation until it has constructed new facilities on a different channel. It is awaiting action by the Commission on pending applications, LMS File Nos. 0000029911 (construction permit, with freeze waiver requested) and 0000036148 (special temporary authority).

The licensee does not now at this time when the Commission will grant either or both pending applications and how long it will take to construct on a newly authorized channel.
