

TECHNICAL SUMMARY

TRANSLATOR STATION K40AD-D  
COTTONWOOD, ETC., ARIZONA  
CHANNEL 29 15 KW (MAX-DA) 2349 M AMSL

1. The instant application was prepared on behalf of KPHO Broadcasting Corporation (“KPHO”), licensee of television translator station K40AD-D, Cottonwood, Etc., AZ, in support of an application for displacement. The K40AD-D facility is licensed for operation on RF Channel 40. KPHO was notified by letter that the 600 MHz Band wireless band licensee in the market, T-Mobile, will be commencing operations that will result in the early displacement of the K40AD-D facility. The letter from T-Mobile is included with this application as an exhibit.

2. Due to the imminent displacement of K40AD-D, KPHO respectfully requests a waiver of the Displacement Freeze to allow it to continue its operations on Channel 29. This is pursuant to the FCC’s *Public Notice* providing tools available to LPTV/Translator stations displaced prior to the Special Displacement Window.\* Grant of this waiver will allow K40AD-D to continue to provide service to the public with as little disruption as possible.

3. Pursuant to the FCC’s *Public Notice*, KPHO is also requesting operation pursuant to Special Temporary Authority (STA) for operation on Channel 29 with a facility identical to that proposed herein.

4. An interference analysis for the proposed K40AD-D facility on Channel 29 was conducted using the FCC’s *TVStudy* software. The results of this analysis are attached as an exhibit. The proposed facility meets the FCC’s interference protection requirements with respect to all protected facilities.
