

### Circumstances justifying Request for Special Temporary Authority

The extraordinary circumstances that warrant temporary operation at variance from the Commission's Rules in this case are fully identified in FCC DA 17-584 dated June 14, 2017. Specifically, the applicant currently operates a LPTV/translator station on channel 39 in New York, NY. T-Mobile has notified the applicant that they will commence operations on its newly licensed spectrum prior to the Special Displacement Window opening in 2018. The applicant has applied for displacement to an in-core channel simultaneously with this application for STA. The public interest will be furthered by grant of this STA request since its grant will avoid interrupted service to the community. The STA will be required until grant of the displacement application following the Special Displacement Window.
