KKEI-CD	Channel 38	ATSC 1.0 FID 71078	ATSC 3.0 Experimental FID 703659

#### **REASON FOR GOING SILENT**

The above-listed four stations have been issued experimental authorizations to transmit in the ATSC 3.0 mode. They are temporarily not conducting experimental operations because of problems with gateway and multiplexer equipment, requiring repeated return to the manufacturer to work out bugs.

The stations are able at this time to transmit only random data in the ATSC 3.0 mode. It is wasteful both to consume and to have to pay for electric power when the transmitters are performing no useful function and experimental testing work cannot be done.

The licensee does not concede that experimental authorizations are subject to any minimum hours of operation requirement and is filing this request only because of a request to do so by the Video Division Staff.
