

PURPOSE OF AMENDMENT

The purpose of this amendment to the pending WROC-DT Channel 21 construction permit application (File No. 0000034937) is to provide the azimuth pattern rotation that was inadvertently omitted in the application that is currently pending. The licensed azimuth pattern is rotated 346 degrees. Since the existing antenna is broadband, it shall be repurposed for post-auction operation; therefore, the azimuth pattern should continue to be rotated 346 degrees. TVStudy demonstrates compliance with Post-transition DTV station interference protection pursuant to Section 73.616 of the FCC Rules. No other changes are proposed.

CERTIFICATION

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998. Mr. Godfrey was a graduate from the University of North Florida and a Distinguished Military Graduate from the University of Florida. As a Professional in the field of Telecommunications he states under penalty of perjury that the information contained in this report is true and correct to the best of his knowledge and belief.
