

PURPOSE OF MINOR MODIFICATION OF CP APPLICATION

It was recently discovered that the authorized post-auction antenna height radiation center is incorrect due to the need for a required extension pole. Since the correct antenna height radiation center is 5.2 m lower than the authorized height, it is required to file a modification of construction permit application to make the correction pursuant to Section 73.1690(c)(1) of the FCC rules.

In order to compensate for the 5.2 m (17.1 ft) antenna height radiation center decrease, the ERP is increasing from the authorized 375 kW to the proposed 400 kW. The attached map demonstrates that the proposed facility would be encompassed by the authorized facility in all azimuthal directions.

CERTIFICATION

This technical statement was prepared by William T. Godfrey, Jr., Engineering Associate with the firm Kessler and Gehman Associates, Inc. having offices in Gainesville, Florida, and has been working with the firm in the field of radio and television broadcast consulting since 1998. Mr. Godfrey was a graduate from the University of North Florida and a Distinguished Military Graduate from the University of Florida. As a Professional in the field of Telecommunications he states under penalty of perjury that the information contained in this report is true and correct to the best of his knowledge and belief.
