

**Exhibit A**

This station has been granted a minor modification to move to a combined antenna from which KPSP-CD, KESQ-TV, and KDFX-CD will operate. As a result, the antenna, transmitter, mask, and feedline associated with one or more of these three stations will be affected (and may need to be updated on the respective Form 399). The antenna will be on KESQ-TV's tower, which is currently undergoing a structural analysis. Once the tower study is complete, we will begin tower mods or replacement as needed. Further information will be provided, as warranted, in Form 399 updates and/or future Transition Progress Reports.
