

W50CI-D DISPLACEMENT APPLICATION FOR CH 25 15 kW DA
LOUISVILLE, KENTUCKY
ENGINEERING NARRATIVE AND RF RADIATION ENVIRONMENTAL ANALYSIS
APRIL 2018

The proposed facility qualifies for displacement as described in FCC PN DA 18-124 released February 9, 2018. W50CI-D is a licensed and operating digital LPTV facility as authorized in file number BLDTT-20100507ACK. The W50CI-D facility is clearly displaced since it is assigned an out of core channel.

The proposed antenna system is an Alive Telecom 16 slot UHF antenna model ATC-BCH316C-5-25, elliptically polarized antenna with 0.75 degrees electrical beam tilt. The maximum relative field in the elevation pattern across the depression angle range of 20 to 90 degrees is less than 0.10 with a radiation center 112 meters above ground. Utilizing formula 10 OF OET Bulletin No. 65, Edition 97-01, a value F of 0.1 has been used to calculate the power density 2 meters above ground. The maximum power density is 0.538 uw/cm squared calculated for an ERP OF 15,000 watts H. polarization and 4,500 watts V. polarization. This value is 0.15% of the Public Exposure MPE per section 1.1310. Based on this analysis it is believed that the proposed facility is in compliance with OET-65 Guidelines.

The applicant will reduce power or cease transmission as required to meet FCC OET-65 Guidelines.

The proposed tower is at an existing site with, building, access road and power.

Attached is a copy of the TVStudy interference analysis for CH 25 based on the proposed 15 kW ERP with and DA antenna described above with an orientation of 150 degrees. As can be seen at the conclusion there is no ISIX above FCC tolerances and no received interference in excess of 2%.

It is believed that the proposed facility provides full protection to other television facilities.

Study created: 2018.03.26 21:34:55

Study build station data: LMS TV 2018-03-19 (26)
