Request for Extension of Special Temporary Authority

RSN West, LLC, (“RSN”) licensee of K38FW, Stateline, NV, hereby requests extension of its special temporary authority to channel share with K31KH-D, Stateline, NV, a commonly owned low power television station serving substantially the same area, granted November 6, 2017. RSN requests to operate K38FW on channel 31 as a shared channel in anticipation of obtaining a new digital channel in the upcoming displacement window. Further technical specifications of the channel sharing request are detailed in the attached engineering summary and exhibits.

RSN is making this request in its current form at the instruction of the Commission staff due to the limitations of the Licensing and Management Systems (“LMS”) application system. Specifically, LMS does not allow an analog low power television station to file a construction permit to permit channel sharing with a digital low power television station.

Because this temporary channel sharing request involves two commonly-owned facilities there is no formal channel sharing agreement associated with this arrangement. Grant of this STA extension request would be in the public interest because it will allow K38FW to return to on air operation and resume serving the viewers of Stateline, NV.
