

Extension of STA Request

May 2018 Update: The licensee respectfully requests extension of special temporary authority to operate at reduced power at the same parameters recently granted in LMS File Nos. 0000035556 and 0000024645. The licensee continues to work on developing its digital transition plan in light of the LPTV digital conversion deadline and repack process. KMUV-LP's Channel 23 analog facility may be displaced prior to the July 13, 2021 digital conversion deadline by the reassignment of KQCA, Stockton, CA, from Channel 46 to Channel 23. It appears that KQCA has been assigned transition phase 8, which is expected to be concluded by March 13, 2020. Accordingly, the licensee requests authority to continue operating at reduced power for no less than six months.
