

Request for Expedited Processing

Licensee hereby requests expedited processing of this displacement application for WFUN-LD in light of the correspondence below dated May 10, 2018 from T-Mobile USA, Inc. (“T-Mobile”). T-Mobile notified licensee, pursuant to FCC Rule 73.3700(g)(4), of its intent to commence operations in its 600 MHz spectrum and the likelihood that WFUN-LD will cause harmful interference to those operations in the PEA #9 market. In light of this correspondence, licensee requests expedited processing of this displacement application so that WFUN-LD may move from channel 48 to channel 20 as quickly as possible and avoid displacement by T-Mobile.

RE: Notification of Intent to Begin 600MHz Operations

Dear WFUN-LD Contact/ Facility ID: 60542

T-Mobile USA, Inc. (T-Mobile) is notifying you that T-Mobile is preparing to commence operations on its 600MHz spectrum in the Partial Economic Area (PEA) #9 by 9/21/2018 and your station is likely to cause harmful interference to T-Mobiles operations.

To determine if your station(s) is likely to cause interference, an interference analysis has been performed, as specified by the Federal Communications Commissions (FCC) Inter-service Interference procedures¹, using publicly available information in the FCCs Licensing and Management System (LMS) for your facility. This analysis predicts field strength at T-Mobiles base station and user equipment locations in the PEA #9 market from your facility. The FCC has set the thresholds at which the predicted field strength from low power TV and translator stations creates a sufficient interference risk to wireless facilities. T-Mobile has determined that your facility exceeds those thresholds and is an interference risk to its wireless operations.

T-Mobile will commence its operations in the PEA #9 market on 9/21/2018. This letter provides the 120 days advance notification required by FCC regulations, 47 CFR §73.3700(g)(4). The FCC regulations also require you to cease operations or eliminate the potential for harmful interference to T-Mobiles wireless facilities in the PEA #9 market.

The FCC will work with you to attempt find a new television channel outside of the new 600 MHz mobile band that will not interfere with T-Mobiles network. You should review the FCCs Tools Available to LPTV/Translator Station Public Notice (enclosed) released on June 14, 2017 and contact Hossein Hashemzadeh, Melvin Collins, or Barbara Kreisman at the FCC for more information about the options available in your area.²

Please email SpectrumClearing@T-Mobile.com once you have determined when you will eliminate the interference. If you would like additional information regarding our findings or if it might be possible to coordinate our operations, please submit a request to Dan Wilson, Sr. Manager, Spectrum Engineering, at SpectrumClearing@T-Mobile.com.

Sincerely,
/s/ Mark Bishop
Sr Manager, Engineering Development, T-Mobile USA, Inc.
