

## **TECHNICAL SUMMARY**

Low Power Television Station K42KA-D  
Moses Lake, Washington  
Channel 33, 1kW ERP, 393.6 AMSL

This application is a Special Displacement Window application for K42KA-D, currently licensed for operation on Channel 42 in Moses Lake, Washington, Facility ID: 182541.

K38LL-D is eligible to file in the Special Displacement Window since it has been licensed and operating prior to April 13, 2017, and is on a channel that has been repurposed for use by 600 MHz Band wireless services.

An interference analysis for the proposed facilities was conducted using the FCC's *TVStudy* software.

The results show no interference caused or received that exceed the FCC limits for protected facilities based upon current and post-transition environments.

A copy of the analysis is attached as an exhibit.
