RF Exposure Statement
Displacement Application
K29AB Monterey, CA
Channel 30

The facility proposed in this application will operate with an effective radiated power (ERP) of 5.41 kW and a center of radiation 30.5 meters above ground level (AGL). An analysis of the radiation levels at 2 meters AGL indicate that the RF exposure level would be below the allowable limit for an uncontrolled area and therefore meets the requirements. All other current safeguards related to the site with regard to both workers and the general public will remain in place.
