RE:  
Request for STA for K50AI-D.

Dear Sirs,

Mineral Television District #1 must request an STA in order to move from channel 50 to 15. This is due to the fact that T Mobile has given Mineral Television District #1 a “120 day notification” letter which indicates Mineral Television District must cease operation on channel 50 by 12/20/2018 – see attached.

Mineral Television District #1 Wishes to continue the operation of this Television Translator Station on channel 15 so PBS programming can continue in Mineral County, NV, as well as other communities in central Nevada that use the signals from this station to input their translators with the least disruption of service possible.

Mineral Television District #1 filed for a Construction Permit on 04/12/2018 to move to channel 15 (0000052560). Due to the fact that no Construction Permit has been issued as of this date, and the fact that this Site is over 10,000 ' AMSL, and usually gets snowed in around the end of October, we request an STA to operate on channel 15. Mineral Television District #1 requests that the STA be issued for 6 months.

Thank you in advance for your consideration of this request,

Norman G. Powell  
Engineer
