

Environmental Statement

KUKR-LD

July 7, 2018

The applicant proposes to operate KUKR-LD at 6 kW ERP horizontally polarized at 64 meters AGL. This proposal is well within both the controlled and uncontrolled radiation exposure guidelines.

Nevertheless, the applicant will ensure placards warning of radiation hazard are posted in and around the site at all time and that station personnel are trained how to turn off the transmitter in the event that anyone climbs the tower.
