CONFIDENTIAL TREATMENT REQUESTED

Pursuant to Sections 0.457 and 0.459 of the FCC's rules and FOIA exemption 4,¹ T-Mobile USA, Inc. ("T-Mobile") respectfully request that the Commission withhold from public inspection and give confidential treatment to the site maps, TV Study files, and deployment scheduled submitted pursuant to Section 27.14 of the Commission's rules.

The FCC and the Freedom of Information Act ("FOIA") recognize the need to protect trade secrets and commercial information. Specifically, FOIA Exemption 4 permits parties to withhold from public inspection "trade secrets and commercial or financial information obtained from a person and privileged or confidential."² Commercial or financial information is confidential under FOIA if its disclosure will cause substantial harm to the competitive position of the entity from which the information was obtained.³ In conformance with this statutory mandate, the Commission allows parties seeking to withhold materials from public inspection under FOIA Exemption 4 to file a request for non-disclosure pursuant to the requirements of Section 0.459.⁴ If a party who submits materials which it wishes withheld from public inspection shows that the materials contain trade secrets or privileged or confidential commercial, financial or technical data, the materials will not be made routinely available for inspection.⁵ Accordingly, pursuant to the Commission's Rules, T-Mobile submits the following explaining the nature of this request for confidential treatment.

The maps, TV Study data, and deployment schedule for which T-Mobile seeks confidential treatment contain commercial and proprietary information regarding specific details of T-Mobile's site planning and wireless network deployment efforts. In particular, the information for which T-Mobile seeks confidential treatment is the location of all transmitter sites in a licensed areas and is a trade secret. This commercially sensitive information customarily would be guarded from competitors and would not be made routinely available for public inspection.⁶

The confidential information contained in the data could result in substantial competitive harm if disclosed. Competitors could use detailed information about T-Mobile's

wireless network and deployment plans to curtail competition.

All information for which protection is sought is treated by T-Mobile as proprietary and confidential. The information is not made available to the public, nor can it be readily obtained or deduced from public sources. To the best of the T-Mobile's knowledge, the information identified as confidential in this request is not available to the public and has not been disclosed to third parties.

Given the current state of the consumer wireless marketplace, T-Mobile believes that three years is a reasonable time period that is sufficient to ensure that release of this information does not cause competitive harm to T-Mobile.

Sincerely,

/s/

Chris Wieczorek, Esq.

Re: Application of Cox Television Tulsa, LLC. for Early Transition from the 600 MHz Spectrum KMYT Tulsa, Oklahoma Facility ID 54420

Dear Ms. Kreisman,

T-Mobile is pleased to support the efforts of KMYT in transitioning early out of the 600 MHz band. In my capacity as Senior Vice President, Radio Network Engineering and Development, I oversee the buildout and licensing of the 600 MHz wireless spectrum acquired by T-Mobile in Auction 1002 to ensure compliance with our interference protection obligations. T-Mobile has entered into an agreement with Cox Television Tulsa, LLC, licensee of KMYT, Tulsa, Oklahoma (Facility ID 54420) (“Station”) to clear certain portions of the 600 MHz spectrum T-Mobile holds licenses for in western Oklahoma.

An early transition of KMYT from Channel 42 to its post-Incentive Auction channel will permit T-Mobile to deploy [Confidential Information] new cell sites on its 600 MHz E Block license.¹ A map of this planned deployment accompanies this submission.

T-Mobile has performed the required Inter-Service Interference (“ISIX”) studies to confirm that these sites will be cleared by the early move of KMYT. KMYT is on channel 42 and is an ISIX Case 3 scenario.²

Once KMYT has transitioned from its pre-Auction channel, T-Mobile will commence deployment of equipment using the 600 MHz band. This deployment is expected to [Confidential Information].

Should you have any further questions, please feel free to contact me.

Sincerely,

/s/

Mark McDiarmid

Senior Vice President, Radio Network Engineering
T-Mobile USA, Inc.

¹ T-Mobile has also entered into an agreement to transition KGEB early as well. The ISIX engineering analysis assumes that station has transitioned as well.

² ISIX Case 4 analysis are also included.

KGEB & KMYT – E Block Summary

- Under Title 47 -> Chapter 1 -> Subchapter B -> Part 27-> Subpart N -> §27.1319 section (b):
 - (b) *A licensee authorized to operate wireless services in the 600MHz downlink band:*
 - (1) *Is not permitted to deploy wireless base stations within the noise-limited contour or protected contour of a broadcast television station licensed on a co-channel or adjacent channel in the 600MHz downlink band*
- Linked stations KOZJ and KXNW have agreed to move early as well
- Analysis for this block takes into consideration the potential interference, as analyzed in TVStudy for the following DL stations:
 - CH41 KMCI-TV
 - CH42 KMYT-TV
 - CH42 KSHB-TV
 - CH43 KODE-TV
- Uplink ISIX-4 stations:
 - CH49 KRBK +5km Buffer
 - CH49 KGEB +5km Buffer
 - CH50 KOPX-TV +5km Buffer
 - CH50 KNWA +5km Buffer
