#### SILENT STA EXTENSION REQUEST EXPLANATION

The station has been silent since 1/31/2018 and requested and received authority to remain silent. The station has been displaced as a result of the TV spectrum repack and filed an application during the LPTV displacement window to move to Channel 23. It appears that the displacement application is mutually exclusive with only one other application, opening the possibility for a settlement, which the licensee will pursue. The repack transition date in the market is 8/2/2019; so even if operation a Channel 23 construction permit is granted, the licensee recognizes that it will have to apply for a short-term interim arrangement within the next 6 months to avoid having the station silent for more than one year.
