

Environmental Statement  
Lakeport Channel 18  
April 30, 2018

The applicant proposes to operate at a height of 26 meters atop a wooden pole at an ERP of 790 watts on channel 18. There are no other broadcast facilities on the tower. This proposal is well within both the controlled and uncontrolled limits for radiation exposure. Towers warning of radiation hazard are posted in and around the site, and station staff are trained how to cease operation in the event that anyone climbs the tower.
