

TVC NY License LLC
Station WNYN-LD
Extension of LPTV Engineering STA

As previously documented to the FCC, WNYN-LD was forced to vacate its operations on Channel 39 due to T-Mobile band clearing. As a consequence, TVC NY License LLC, the licensee of WNYN-LD (“TVC”) applied for, and the FCC granted, the instant STA so that WNYN-LD could continue its operations on Channel 29. WNYN-LD currently is operating on Channel 29 with its valuable Spanish language television service for New York. In addition, TVC has pending before the Commission an application for WNYN-LD to displace to Channel 30 for a permanent operation. FCC File No. 0000048135 The instant application seeks to continue the current STA to operate WNYN-LD on Channel 29 while the displacement application remains pending. Continuation of the Channel 29 operation would serve the public interest in maintaining a long-standing and important Spanish language television service for New York.
