Panama City, Florida  
Repack Modification Services  
Additional Mobilization - Services

Dear Doug,

Tower Consultants Incorporated has been retained to perform modification and antenna and transmission line installation on the WFSG 486-ft guyed tower located in Panama City, Florida. Our field crew mobilized to the tower site on June 6, 2018 and began work to allow installation of the WFSG TV antenna and transmission line. While awaiting additional parts and equipment our crew mobilized to another project. The crew will not be available to return to the Panama City tower site until sometime between October 1<sup>st</sup> and October 15<sup>th</sup>. At that time the television antenna installation will be completed and the antenna system will be tested.

Please do not hesitate to contact me should you have any questions or wish to discuss the remobilization schedule.

Sincerely,

Ron Dozsa  
Project Manager  
Tower Consultants Incorporated
