

Special Temporary Authority Statement
Reduced Power Operation
CBS Broadcasting Inc.
WCBS-TV New York, NY Facility ID 9610
Ch. 33 519.1 m 245 kW

CBS Broadcasting Inc. (CBS), licensee of WCBS-TV New York, NY, seeks to renew its temporary authorization for reduced effective radiated power (ERP) to facilitate construction at One World Trade Center (OWTC) being done to support other broadcasters migrating to this site.¹ To facilitate these ongoing efforts without risking radiofrequency exposure in excess of FCC limits, *CBS* seeks to continue operating with a reduced WCBS-TV ERP of 245 kW as specified herein while making no other changes. We understand the work will take no more than six additional months.

Since the original STA was granted, *CBS* was granted a License for the newly constructed OWTC facility.² As shown by the contour locations in **Figure 1**, coverage from the STA facility does not extend beyond the licensed facility.

¹ See Engineering STA - LMS File Number 0000049539.

² See LMS File Number 0000048556, which was filed March 13, 2018.
