

## **EXPLANATORY ATTACHMENT**

Oklahoma Community Television, LLC (“OCT”) hereby requests an extension of the instant Engineering Special Temporary Authority (“STA”), which was necessitated by T-Mobile’s intention to displace OCT from its licensed channel. An application for a construction permit for displacement is on file but remains pending, and OCT requests permission to continue operating under the parameters of the existing STA until the underlying displacement application is granted. All reasons for the initial grant of the existing STA remain valid, and the grant of an extension will serve the public interest by permitting OCT to continue providing programming to the public with as little disruption as possible to viewers.
