

AMENDMENT TO PENDING CONSTRUCTION PERMIT APPLICATION
INTERFERENCE ACCEPTANCE

DISPLACEMENT APPLICATION FILE #0000053644
K49IT-D Hagerman, Idaho
September 19, 2018

Hagerman Translator District (“HTD”) hereby requests to amend its pending Displacement Filing Window application for TV Translator station K49IT-D at Hagerman, ID. This amendment is to accept interference from a mutually exclusive proposal filed during the same Displacement Filing Window.

The originally filed displacement window application (#0000053644) is mutually-exclusive with KVUT-LD displacement application file # 0000054653 on Channel 18.

The KVUT-LD proposal causes impermissible interference to the HTD Displacement Application on Channel 18 and creates a mutually-exclusive situation with both displacement applications. However, the K49IT-D proposal does not cause interference to the KVUT-LD proposal.

KVUT-LD has agreed to amend their pending application to rotate the proposed antenna pattern an additional 10 degrees to reduce the interference to the K49IT-D proposal to approximately 2.7% interference which exceeds the permissible FCC 2% limit by 0.7%. That amendment was filed on Sept 19, 2018 (Displacement Amendment # 0000024850)

HTD has agreed to accept this additional interference so that both applications may be granted and eliminate any mutually-exclusive situation with the two applications.

Hence, HTD licensee of K49IT-D agrees to accept the 2.7% interference from KVUT-LD at Twin Falls, ID.

All other technical parameters for the pending displacement application remain unchanged.
