PURPOSE OF AMENDMENT

This amendment reports that the make and model number of the antenna that was installed is different from the make and model shown on the underlying construction permit.

The construction permit specified an SXA Model CA2 antenna. The response to Question of Form 2100 has been changed to show that the antenna that was installed was an Alive Model No. ATC-BCH42PC 1-5.

A separate exhibit is attached to this amendment, showing that the directional pattern of the installed antenna is identical on every 10-degree azimuth with the pattern of the antenna specified in the construction permit.
