**Engineering Statement**

**K31LZ, FI 69920**

Applicant is seeking a waiver of Rule 312G to remain silent for an additional 6 months. This site was damaged by lightning and filed for Silent Status. The applicant had filed for a displacement to Ch 9 in the most recent filing window and has been granted a construction permit on Ch 9.

The equipment that was damaged was analog and the Applicant believed it was prudent to wait for the digital channel assignments before ordering equipment. The Camp Verde TV Club is a small non-profit organization with limited resources. They have built two of the three stations and need additional time to purchase and install the third.

Given the lead times for antenna and transmitter deliveries and tower crew scheduling the Applicant will need additional time to construct the facility to the new in-core digital channel.

Respectfully submitted,

Susan Hansen
