

## **SUPPORT OF WGHP FOR EARLY TRANSITION OF WXII-TV**

By the signature below, WGHP License, LLC, licensee of WGHP, High Point, North Carolina (Facility ID No. 72106) ("WGHP") wishes to express its support of a change in the Transition Phase of WXII-TV, Winston-Salem, North Carolina (Facility ID No. 53921) from Phase 9 to Phase 5.

Currently, both WGHP and WXII-TV are assigned to Transition Phase 9 of the FCC's nationwide "repack" transition. As such, WXII-TV and WGHP are both part of Linked Station Set 66, and WGHP is unable to perform transition testing (or ultimate launch of post-transition channel 31) without coordinating with WXII-TV because WXII-TV is "upstream" from WGHP (because WXII-TV currently operates on pre-transition channel 31, which is WGHP's post-transition channel).

If WXII-TV were to be granted permission to change its Transition Phase to 5, then that would obviate the need for WGHP to coordinate its repack project (testing and final launch) with WXII-TV. Such a result would be beneficial to WGHP in terms of cost, time, and resources expended during the final stages of WGHP's repack project.

WGHP believes that WXII-TV's move from Transition Phase 9 to Transition Phase 5 will be beneficial to the overall nationwide transition and will specifically benefit WGHP in its efforts to meet its transition obligations.

Accordingly, WGHP hereby expresses its support for WXII-TV's proposed move from Transition Phase 9 to Transition Phase 5.
