

Extension of STA Request
NPG of Monterey-Salinas CA, LLC
KMUV-LP, Monterey, California

Extension of STA Request

November 2018 Update: The licensee respectfully requests extension of special temporary authority to operate at reduced power at the same parameters recently granted in LMS File Nos. 0000054640, 0000035556, and 0000024645. The licensee has the equipment necessary to build out the channel 21 digital facility authorized in FCC File No. BMPDTL-20111018ARV. However, the owner of the tower is experiencing issues with the local zoning and permitting process, which is causing delay for the licensee's installation. Accordingly, the licensee requests authority to continue operating at reduced power for no less than six months.
