Donald G. Everist, being duly sworn upon his oath, deposes and states that:

He is a graduate electrical engineer, a Registered Professional Engineer in the District of Columbia, and is President, Secretary and Treasurer of Cohen, Dippell and Everist, P.C., Consulting Engineers, Radio - Television, with offices at 1420 N Street, N.W., Suite One, Washington, D.C. 20005;

That his qualifications are a matter of record in the Federal Communications Commission;

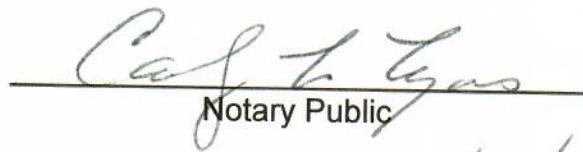

That the attached engineering report was prepared by him or under his supervision and direction and

That the facts stated herein are true of his own knowledge, except such facts as are stated to be on information and belief, and as to such facts he believes them to be true.

Donald G. Everist
District of Columbia
Professional Engineer
Registration No. 5714

Subscribed and sworn to before me this 4th day of December, 2018.

Carolyn L. Hayes
Notary Public

My Commission Expires: 2/28/2023

COHEN, DIPPELL AND EVERIST, P.C.

AMENDMENT APPLICATION
W33CR-D, CHAMBERSBURG, PENNSYLVANIA

PAGE 1

This engineering statement has been prepared on behalf of WITF, Inc., licensee of WITF-DT, Harrisburg, Pennsylvania in support of a displacement application to change licensed channel 33 to channel 34. The initial displacement application (FCC File No. 0000053818) was in accordance with the Special Displacement Window announced by the FCC in the Public Notice dated February 9, 2018. This amendment is in accordance with the FCC letter dated October 1, 2018 response 1800E3-RLG.

Transmitter Site

The proposed Channel 34 DTV translator operation will be located on the same tower as now licensed W33CR-D.

The proposed Channel 34 antenna will be mounted on a pole extending from the deck of an existing observation tower with a total overall antenna height above ground of 28 meters (92 feet).

There is no change in overall height of the state-owned structure. The site is located at Blue Mountain (Clarks Knob) approximately 3.2 kilometers west of Upper Strasburg in Franklin County, Pennsylvania. Exhibit E-1 is a vertical sketch of the existing observation tower and the proposed translator transmitting antenna.

The geographic coordinates of the existing site are as follows:

North Latitude: 40° 03' 00"

West Longitude: 77° 44' 54"

NAD-27

COHEN, DIPPELL AND EVERIST, P.C.

AMENDMENT APPLICATION
W33CR-D, CHAMBERSBURG, PENNSYLVANIA

PAGE 2

North Latitude: 40° 03' 00.3"

West Longitude: 77° 44' 52.9"

NAD-83

Equipment Data

Transmitter: Type-approved

Transmission Line: Andrew, Type LDF5-50, 7/8 inch concentric copper length 30 feet (9.2 meters)–0.903 dB/100 Ft

Antenna: ERI, Model AL8OC-34-E, non-directional antenna with 1.75° electrical beam tilt and no null fill

Out-of-Channel
Emission Mask: Full-Service

Power Data

Transmitter: 1.44 kW 1.57 dBk

Transmission Line Loss: 93.95% 0.27 dB

Input Into Antenna: 1.35 kW 1.30 dBk

Antenna Power Gain: Horizontal 11.12 10.46 dBd
Vertical 3.34 5.23 dBd

Effective Radiated Power, Maximum Horizontal 15 kW 11.76 dBk
Vertical 4.50 kW 6.53 dBk

Elevation Data

Vertical dimension of the Channel 34 antenna 5.3 meters
17.3 feet

COHEN, DIPPELL AND EVERIST, P.C.

AMENDMENT APPLICATION
W33CR-D, CHAMBERSBURG, PENNSYLVANIA

PAGE 3

| | |
|--|-----------------------------|
| Overall height above ground of the proposed antenna | 28 meters 722.9 feet |
| Center of radiation of Channel 34 antenna above ground | 25.4 meters 83.3 feet |
| Elevation of site above mean sea level | 694.9 meters 2279.9 feet |
| Center of radiation of Channel 34 antenna above mean sea level | 720.3 meters 2363.2 feet |
| Overall height above mean sea level of existing tower | 722.9 meters 2371.7 feet |

Note: Slight height differences may result due to conversion to metric.

As indicated above, the transmitter with typical power output of 1.44 kW will deliver 1.35 kW to the input of the antenna. The antenna, having a maximum horizontal power gain of 11.12 will produce a maximum horizontal ERP of 15 kW. A coverage map providing the normally protected contour of the proposed digital translator facility has been included as Exhibit E-4 of this report.

Other Broadcast Facilities

An analysis was completed to determine the presence of stations in the vicinity of the W33CR tower using the Consolidated Data Base Systems (“CDBS”) data and within the Commission’s Licensing and Management System (“LMS”).] Within 0.2 km of the proposed site, there are no authorized FM radio or FM translator stations, no DTV and NTSC or TV translator television stations other than the licensed W33CR operation. There are no AM facilities within

COHEN, DIPPELL AND EVERIST, P.C.

AMENDMENT APPLICATION
W33CR-D, CHAMBERSBURG, PENNSYLVANIA

PAGE 4

3.22 km of the existing tower. Although no adverse technical effects are expected due to the proposed changes, the licensee will take measures to resolve any problems proven to be related to the changes proposed in this application.

Interference Analysis

A study of predicted interference caused by the proposed Channel 34 W33CR-D operation has been performed using the Longley-Rice program for which the source data has been posted by the Commission on its website at fcc.gov/oet/tvstudy. Comparison of service/interference areas and population indicates this model closely matches the FCC's digital TVStudy 2.2 evaluation program. Best efforts have been made to use data and calculation identical to the FCC's program. The model employs the Longley-Rice propagation methodology and evaluates in grid cells of approximately 1 sq. km. Using one-second terrain data sampled approximately every 1.0 km at one-degree azimuth intervals with 2010 census centroids, all studies are based upon data in the Commission's current Licensing and Management System ("LMS") database update of the FCC's engineering database.

Contour Data

Utilizing the formula in Section 73.625(b)(2) for the effective heights along each radial, the depression angle A_h , for each azimuth has been calculated. The maximum radiation value has been used to calculate the ERP where the vertical radiation pattern field value at these angles is greater than 90% of the maximum.

COHEN, DIPPELL AND EVERIST, P.C.

AMENDMENT APPLICATION
W33CR-D, CHAMBERSBURG, PENNSYLVANIA

PAGE 5

Table I provides the distances calculated by TVStudy 2.2 along each radial spaced every ten degrees in azimuth to the predicted F(50,90) 51 dBu contour, the effective radiated power and the effective antenna heights. The predicted 51 dBu contour determined from these distances are shown on the attached map (Exhibit E-4).

Coverage

The average elevation data for 3.2 to 16.1 km along each radial are based upon the one-second NGDC profile data.

The F(50,90) DTV coverage contour has been computed using TVStudy 2.2 which has as its basis the propagation data for Channels 14-69, as published by the FCC in Figure 10b and Figure 10c, Section 73.699 of the FCC Rules and Regulations.

Table I includes the distances to the 51 dBu F(50,90) normally protected coverage contour, the average elevation 3.2 to 16.1 km, and the antenna height above average terrain along azimuth angles spaced every 10° starting from true north.

Radiofrequency Field Level

W33CR-D

Channel 34 Frequency: 590-596 MHz Range
 Total ERP = 19,500 watts
 Polarization = Elliptical
 RCAGL-2 meters = 23.4 meters

The proposed Channel 34 proposes to use a ERI Type AL8OC-34-E with a field factor less than 0.170 at any angle 20° to 90° below the horizontal in the vicinity of the existing tower site. A value of 0.170 will be used in the calculation.

COHEN, DIPPELL AND EVERIST, P.C.

AMENDMENT APPLICATION
W33CR-D, CHAMBERSBURG, PENNSYLVANIA

PAGE 6

$$\frac{S = 33.4 (F^2) \text{ Total ERP}}{R^2} \quad \begin{aligned} \text{Total ERP} &= 19,500 \text{ watts (Elliptical Polarization)} \\ R &= 23.4 \text{ meters} \\ F &= 0.170 \text{ (field factor)} \end{aligned}$$

$$S = 31.3 \mu\text{W/cm}^2$$

The proposed Channel 34 contributes $34.3 \mu\text{W/cm}^2$ at two meters above ground level. The limit for an uncontrolled environment is $395.3 \mu\text{W/cm}^2$ and the limit for a controlled environment is $1976.7 \mu\text{W/cm}^2$ for a station broadcasting in the 590-596 MHz range.

Therefore:

The proposed Channel 34 operation contributes less than 9% RFF for an uncontrolled environment two meters above ground in the vicinity of the existing tower site and less than 2% for the controlled environment.

Authorized personnel and rigging contractors will be alerted to the potential zone of high field levels on the tower, and if necessary, the proposed station will operate with reduced power or terminate the operation of the transmitter as appropriate when it is necessary for authorized personnel or contractors to perform work on the tower. Workers and the general public, therefore, will not be subjected to RFF levels in excess of the current FCC guidelines.

Environmental Assessment

An environmental assessment (“EA”) is categorically excluded under Section 1.1306 of the FCC Rules and Regulations as the tower was constructed prior to the requirements specified in WT Docket No. 03-128 and the licensee indicates:

- (a)(1) The existing structure is not located in an officially designated wilderness area.
- (a)(2) The existing structure is not located in an officially designated wildlife preserve.

COHEN, DIPPELL AND EVERIST, P.C.

AMENDMENT APPLICATION
W33CR-D, CHAMBERSBURG, PENNSYLVANIA

PAGE 7

- (a)(3) The proposed facilities will not affect any listed threatened or endangered species or habitats.
- (a)(3)(ii) The proposed facilities will not jeopardize the continued existence of any proposed endangered or threatened species or likely to result in the destruction or adverse modification of proposed critical habitats.
- (a)(4) The proposed facilities located on a structure which was built prior to the adoption of WT Docket No. 03-128 and is grandfathered and has not affected any known districts, sites, buildings, structures, or objects significant in American history, architecture, archaeology, engineering, or culture.
- (a)(5) The existing structure is not located near any known Indian religious sites.
- (a)(6) The existing structure is not located in a flood plain.
- (a)(7) The installation of the DTV facilities on an existing structure will not involve a significant change in surface features of the ground in the vicinity of the tower.
- (a)(8) It is not proposed to equip the structure with high intensity white lights unless required by the FAA.
- (b) Workers and the general public will not be subjected to RFF levels in excess of the current FCC guidelines contained in OET Bulletin No. 65, Edition 97-01, dated August 1997 and Supplement A.

ALLOCATION STUDY

tvstudy v2.2.5 (4uoc83)
Database: localhost, Study: W33CR-Ch34FinalHeight, Model: Longley-Rice
Start: 2018.12.06 15:44:25

Study created: 2018.12.06 15:44:25

Study build station data: LMS TV 2018-12-06

Proposal: W33CR-D D34 LD LIC CHAMBERSBURG, PA

File number: Ch34FinalHeight

Facility ID: 73081

Station data: User record

Record ID: 137

Country: U.S.

Build options:

Protect pre-transition records not on baseline channel

Search options:

Non-U.S. records included

Baseline record excluded if station has CP

Individual records excluded:

20051123AKN WJAC-TV D34 DT LIC JOHNSTOWN, PA BLCDT20051123AKN

Stations potentially affected by proposal:
