Incentive Auction Channel Reassignment

Application for Minor Modification of Digital Television Station Construction Permit

prepared for

Gray Television Licensee, LLC

WKYT-TV Lexington, KY
Facility ID 24914
Ch. 21 900 kW 296 m

Gray Television Licensee, LLC (“*Gray*”) is the licensee of digital television station WKYT-TV, Channel 36, Facility ID 24914, Lexington KY. Reassignment of WKYT-TV from Channel 36 to Channel 21 was specified in the *Incentive Auction Closing and Channel Reassignment Public Notice* (“*CCRPN*”, DA 17-317, released April 13, 2017). A Construction Permit (“CP” file# 0000034282) authorizes WKYT-TV to operate on Channel 21 at 1000 kW effective radiated power (“ERP”) with a directional antenna at 296 meters height above average terrain (“HAAT”). *Gray* proposes herein a minor modification of the reassignment CP to reduce the ERP and to adjust the directional antenna pattern. No other changes are sought.

As with the current authorization, the proposed Channel 21 operation will employ a new antenna system to be side-mounted on a mast atop the WKYT-TV tower in lieu of the existing Channel 36 antenna. The tower structure corresponds to FCC Antenna Structure Registration number 1030383. No change to the overall structure height will result.

The proposed antenna is an elliptically polarized directional Dielectric model TFU-25JSC/VP-R C150 (30 percent vertical polarization). *Gray* proposes to operate WKYT-TV with an ERP of 900 kW at 296 meters HAAT. The maximum horizontally polarized ERP is 900 kW and the maximum vertically polarized ERP is 270 kW. The vertically polarized component will not exceed the horizontally polarized component at any azimuth. The directional antenna’s azimuthal patterns are depicted in Figures 1 and 1A for horizontal and vertical polarization, respectively. The antenna’s elevation pattern is depicted in Figure 2.

Figure 3 supplies a map that demonstrates compliance with §73.625(a)(1) regarding coverage of the entire principal community. The proposed facility's predicted population exceeds 95 percent of the CCRPN baseline facility's population.

Interference study per FCC OET Bulletin 69¹ shows that the proposal complies with the 0.5 percent limit of new interference caused to pertinent nearby post-auction full service and Class A television stations and reassessments as required by §73.616. The interference study output report is provided as Table 1.

Human Exposure to Radiofrequency Electromagnetic Field (Environmental)

The proposed operation was evaluated for human exposure to RF energy using the procedures outlined in the FCC's OET Bulletin Number 65. Based on OET-65 equation (10), and considering 10 percent antenna relative field in downward elevations (pattern data shows less than 10 percent relative field at angles 10 to 90 degrees below the antenna), the calculated signal density near the tower at two meters above ground level attributable to the proposed facility is $4.7 \mu\text{W/cm}^2$, which is 1.4 percent of the general population/uncontrolled maximum permitted exposure limit. This is below the five percent threshold limit described in §1.1307(b) regarding sites with multiple emitters, categorically excluding the applicant from responsibility for taking any corrective action in the areas where the proposal's contribution is less than five percent.

The general public will not be exposed to RF levels attributable to the proposal in excess of the FCC's guidelines. RF exposure warning signs will continue to be posted. With respect to worker safety, the applicant will coordinate exposure procedures with all pertinent stations and will reduce power or cease operation as necessary to protect persons having access to the site, tower, or antenna from RF electromagnetic field exposure in excess of FCC guidelines. This

¹FCC Office of Engineering and Technology Bulletin number 69, *Longley-Rice Methodology for Evaluating TV Coverage and Interference*, February 6, 2004. This analysis employed the FCC's current "TVStudy" software with the default application processing template settings, 2 km cell size, and 1 km terrain increment. Comparisons of various results of this computer program (run on a Mac processor) to the FCCs implementation of TVStudy show excellent correlation.

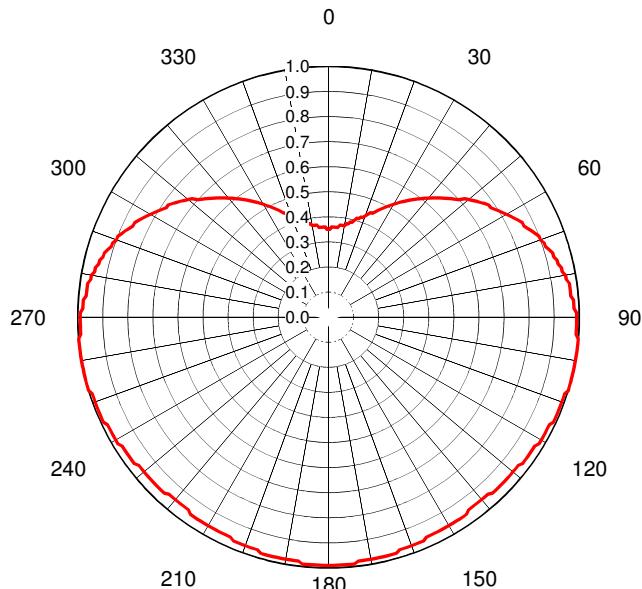

exhibit is limited to the evaluation of exposure to RF electromagnetic field. No increase in structure height is proposed.

Section	Question	Response
Proposed Community of License	Facility ID	24914
	State	Kentucky
	City	LEXINGTON
	DTV Channel	21
Facility Type	Facility Type	Commercial
	Station Type	Main
Zone	Zone	2

Section	Question	Response
Antenna Structure Registration	Do you have an FCC Antenna Structure Registration (ASR) Number?	Yes
	ASR Number	1030383
Coordinates (NAD83)	Latitude	38° 02' 23.0" N+
	Longitude	084° 24' 10.0" W-
	Structure Type	TOWER-A free standing or guyed struct
	Overall Structure Height	304.8 meters
	Support Structure Height	298.7 meters
	Ground Elevation (AMSL)	301.4 meters
Antenna Data	Height of Radiation Center Above Ground Level	289.3 meters
	Height of Radiation Center Above Average Terrain	296.2 meters
	Height of Radiation Center Above Mean Sea Level	590.7 meters
	Effective Radiated Power	900 kW

Antenna Technical Data	Section	Question	Response
	Antenna Type	Antenna Type	Directional Custom
		Do you have an Antenna ID?	Yes
		Antenna ID	1001284
	Antenna Manufacturer and Model	Manufacturer:	DIE
		Model	TFU-25JSC/VP-R C150
		Rotation	0 degrees
		Electrical Beam Tilt	0.75
		Mechanical Beam Tilt	Not Applicable
		toward azimuth	
	Polarization	Elliptical	
	DTV and DTS: Elevation Pattern	Does the proposed antenna propose elevation radiation patterns that vary with azimuth for reasons other than the use of mechanical beam tilt?	No
		Uploaded file for elevation antenna (or radiation) pattern data	

Directional Antenna Relative Field Values (Pre-rotated Pattern)

Degree	V _A (Authorized Value)						
0	0.350	90	0.990	180	0.990	270	0.990
10	0.370	100	1.000	190	0.980	280	0.960

80	0.960	170	0.980	260	1.000	350	0.370

Additional Azimuths

Degree	V _A

Construction Permit Certifications	Section	Question	Response
	Post-Incentive Auction Expedited Processing	It will operate on the DTV channel for this station as established in the post-incentive auction channel reassignment public notice.	Yes
		It will operate post-incentive auction facilities that do not expand the noise-limited service contour in any direction beyond that established by the post-incentive auction channel reassignment public notice.	No
		It will operate post-incentive auction facilities that match or reduce by no more than five percent with respect to predicted population from those defined in the post-incentive auction channel reassignment public notice.	Yes
		The antenna structure to be used by this facility has been registered by the Commission and will not require re-registration to support the proposed antenna, OR the FAA has previously determined that the proposed structure will not adversely affect safety in air navigation and this structure qualifies for later registration under the Commission's phased registration plan, OR the proposed installation on this structure does not require notification to the FAA pursuant to 47 C.F.R. Section 17.7.	Yes
	Environmental Effect	Would a Commission grant of Authorization for this location be an action which may have a significant environmental effect? (See Section 1.1306 of 47 C.F.R.)	No
	Broadcast Facility	The proposed facility complies with the applicable engineering standards and assignment requirements of 47 C.F.R. Sections 73.616, 73.622(i), 73.623(e), 73.625, 73.1030, and 73.1125.	Yes
