

Variation from CP (File No. BMPDVL-20110916ABO)
KXNU-LD (FID 181808)

While preparing to construct the station, licensee determined that the identified tower was shorter than specified in the construction permit application. Therefore, it was necessary to place the antenna at a lower height. The station was constructed as specified in the construction permit, except as noted below:

Height of Radiation Center AGL: 18 meters

Height of Radiation Center AMSL: 145 meters

Overall Height of Antenna Structure AGL: 19 meters
