

KIMT(TV), Mason City, IA
Facility ID Number: 66402

On October 18, 2018, KIMT commenced ongoing operations on its post-auction repack Channel 24 with the interim Special Temporary Authority ("STA") facilities authorized in FCC File No. 0000056419. In so doing, KIMT officially ceased operations on its pre-auction Channel 42. On November 30, 2018, KIMT requested an STA to operate with the primary facilities specified in its Construction Permit File No. 0000027610, but at a reduced power. The STA was granted on December 10, 2018. See File No. 0000063884. KIMT is currently operating with these reduced power STA facilities. On November 30, 2018, KIMT also requested an extension of its Construction Permit so that it could submit an application to modify the Permit to specify the technical facilities authorized in the station's reduced power STA. The extension was granted on December 12, 2018. See File No. 0000063878. On December 21, 2018, KIMT filed the modification application. See File No. 0000064335. As soon as the modification application is granted, KIMT will promptly file an application for a covering license, thus officially completing its channel reassignment.
