

## **Request for Waiver of Contingent Applications Rule**

Call Sign: W21DM-D

Facility ID: 188698

Applicant respectfully submits this request for a waiver of the FCC's "contingent applications" rule.<sup>1</sup>

Applicant has used *TVStudy* to identify Channel 8 as an available channel for the station's proposed displacement facility. Applicant's proposed displacement channel is either a channel voluntarily relinquished by a License Relinquishment Station, Channel Sharing Station or Band Changing Station, or a pre-auction channel of a Reassigned Station. Applicant therefore requests a waiver of the contingent applications rule as allowed for under the *Special Displacement Window Public Notice*.<sup>2</sup> Grant of the Applicant's waiver request is in the public interest because it will conserve valuable Commission resources and allow the station to serve viewers going forward.

Also, please note that the underlying attachments to the previous filing appear to be corrupted, so the Applicant is unable to view them. Should the Commission require copies of these documents, they will be made available upon request.

The Commission may waive any provision of its rules on its own motion or if an applicant shows good cause for a waiver.<sup>3</sup> Granting Applicant's waiver request will serve the public interest without resulting harm to the current licensee of Channel 8. The FCC has recognized that allowing eligible stations to apply for pre-auction channels in the repacked television band that full power and Class A stations will relinquish through the incentive auction and repacking process will "ensure that as many potential channels as possible are available for operating LPTV/translator stations that are subject to displacement . . . ."<sup>4</sup> Applicant agrees not to begin transmitting on Channel 8 prior to discontinuation of operation by the station currently licensed to use the adjacent channel 7.<sup>5</sup>
