EXHIBIT FOR CONSTRUCTION PERMIT EXTENSION REQUEST

Applicant seeks a single extension of the expiration date for a construction permit, for which a minor modification was granted on November 29, 2018 (#0000007841) to increase power. Due to Applicant's proximity to Canada, Applicant was awaiting coordination with Canada before it could order equipment for WUEK-LD to operate on channel 25. Applicant has now been informed that estimated delivery date for the transmitter and combiner needed for this site will be February 14, 2019, which falls nine days after the construction permit expiration date of February 5, 2019. Applicant believes it will not need the standard 180-day extension, and also that this extension will not disrupt the post-auction transition schedule.
