

**Engineering STA for Interim Facilities
WRUA(DT), Fajardo, PR (Facility ID 15320)**

Eastern Television Corporation (“ETC”), the licensee of Station WRUA-DT, Fajardo, Puerto Rico (Facility ID No. 15320), has been unable to construct its post-Auction Channel 16 permanent facilities because electric power has not yet been restored to the tower site in the aftermath of Hurricane Maria. While ETC awaits eventual power restoration for its permanent post-Auction operations, it has obtained an antenna, transmission line and transmitter to operate at a temporary site specified herein.

Grant of this STA is warranted in light of the extraordinary circumstances it faces with regard to the continued lack of commercial electric power to the permanent transmitter site. Moreover, the public interest will be served by allowing the resumption of operations of WRUA from the interim site.
